

All panels can also be custom made into special sizes and colours as well as individual graphics. We use your design or you choose from numerous graphics such as photo concrete. More images, models and our full collection can be found on our website www.dade-design.com

dade PANEL 'Graphic Concrete'

Product features

- Concrete: dade ROC high performance concrete
- Corrosion resistant
- Available in the colours concrete natural grey (standard), anthracite & beige (other colours on request)
- The panels can be cut with an angle grinder or a stone saw as they do not contain steel reinforcements
- Each surface is subject to natural variations. Small pores and streak formation, minimal shrinkage cracks or cavities and colour deviations are no reason for reclamation but belong – like the knots and annual rings of the wood – to the unique appearance of the material. Every concrete piece is unique.
- The panels are not suited for structural applications (eg. facades or self-supporting walls) as well as places with constant humidity (eg. swimming pools). For shower areas, the dade coating is mandatory.
- Maintenance: Please follow our maintenance instructions.

Technical specifications

Dimensions: 2600 x 900mm (tolerance +/- 1mm per running meter)

Thickness: 15mm* (+/- 1,5mm)

Breaking load: First crack: 132kg / Fracture: 219kg

Weight per panel: 84kg

*All panels except for dade PANEL Pur

Thickness dade PANEL Pure: 13mm

CONCRETE PANELS

dade Collection

dade Concrete Panels

With dade PANELS made from real concrete, we have created a new generation of wall panels for a variety of uses: The comparatively light panels that are only 15mm thick and made from dade ROC high-performance concrete. The panels are available in concrete natural grey, beige and anthracite and are suited for applications in wet areas as bathrooms, as well as kitchens and other living areas. The different surfaces fit into diverse living areas and provide an exciting contrast to the environment.
